Agree

No Thanks

Improved @property section in Elements > Styles

Editable @property rule

You can now edit the [@property CSS at-rule](#) in the corresponding section in the **Elements > Styles** pane.

Note that DevTools shows non-editable rules in *italic text*.

Chromium issue: [1471123](#).

This site uses cookies to deliver and enhance the quality of its services and to analyze traffic. If you agree, cookies are also used to serve advertising and to personalize the content and advertisements that you see. [Learn more about our use of cookies.](#)

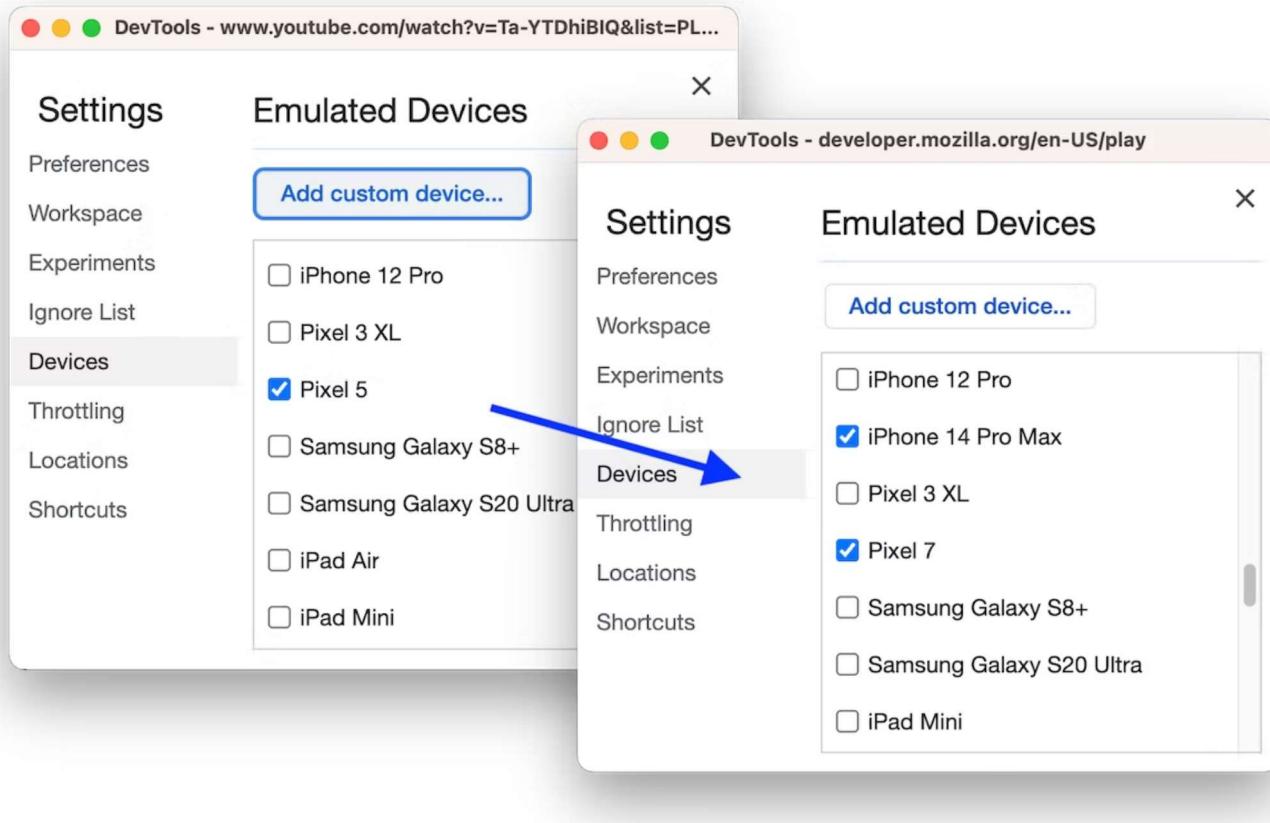

The screenshot shows the DevTools Issues panel for developer.mozilla.org/en-US/play. The 'Issues' tab is selected. There is one issue listed: 'Ignored @property rule'. The description states: 'An @property rule is ignored because it contains an invalid property or is missing a required one: syntax: "<percentages>"'. Under 'AFFECTED RESOURCES', it shows '1 source' with a link to 'runner.html:2'.

Chromium issue: [1473283](#).

Updated list of devices to emulate

The user agent strings in [Settings > Devices](#) has been updated to reflect the average usage of browsers and operating systems. You can now emulate more of the up-to-date devices in [device mode](#).

This site uses cookies to deliver and enhance the quality of its services and to analyze traffic. If you agree, cookies are also used to serve advertising and to personalize the content and advertisements that you see. [Learn more about our use of cookies.](#)

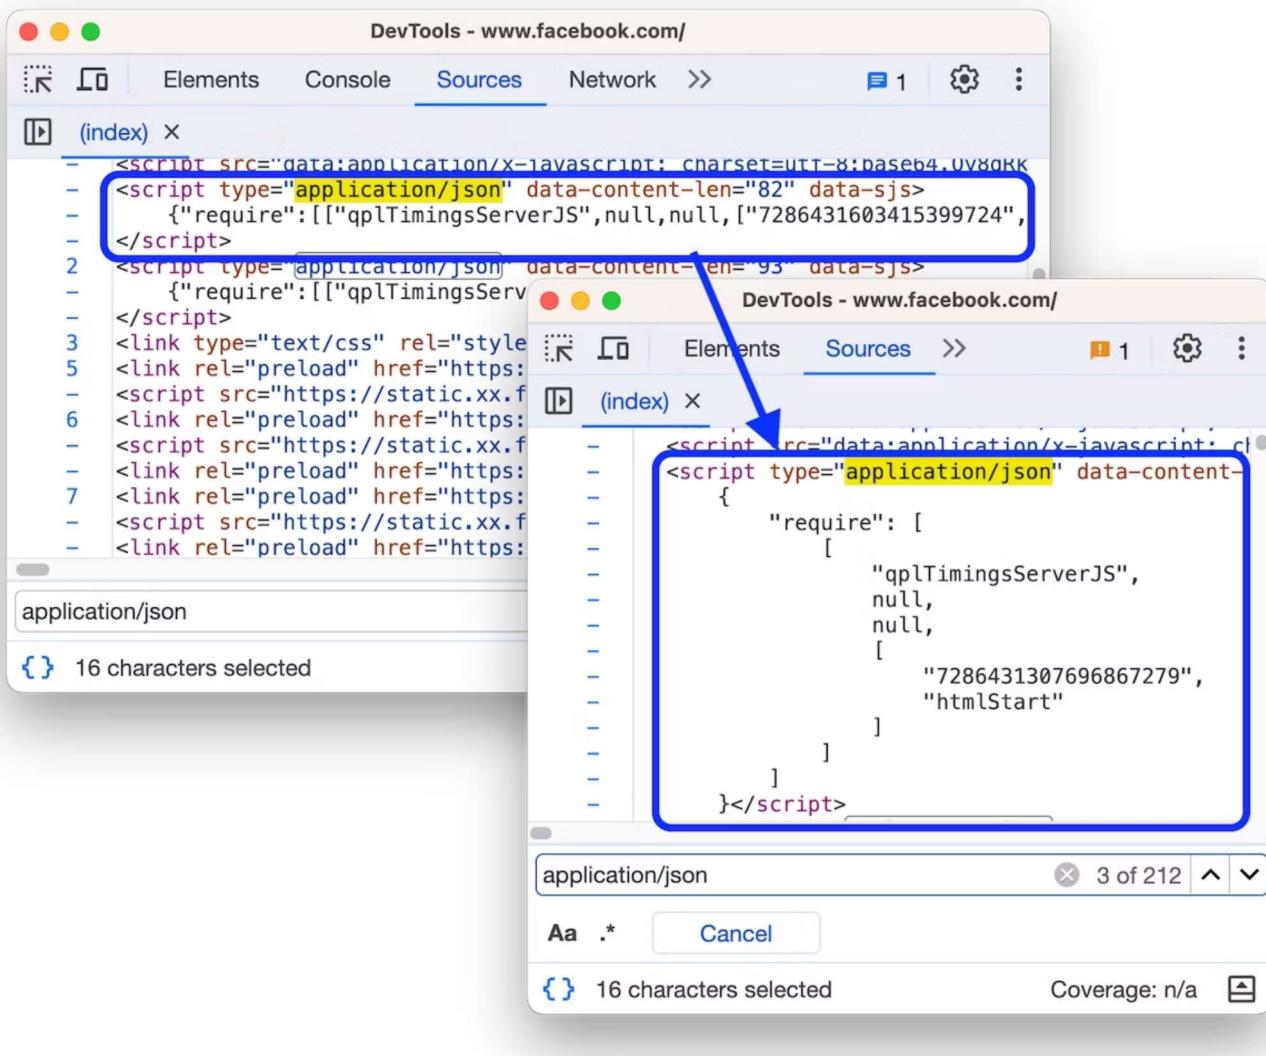

Chromium issue: [1479733](#).

Pretty-print inline JSON in script tags in Sources

The **Sources** panel now supports pretty-printing inline JSON in `<script>` HTML tags for easier debugging.

This site uses cookies to deliver and enhance the quality of its services and to analyze traffic. If you agree, cookies are also used to serve advertising and to personalize the content and advertisements that you see. [Learn more about our use of cookies.](#)

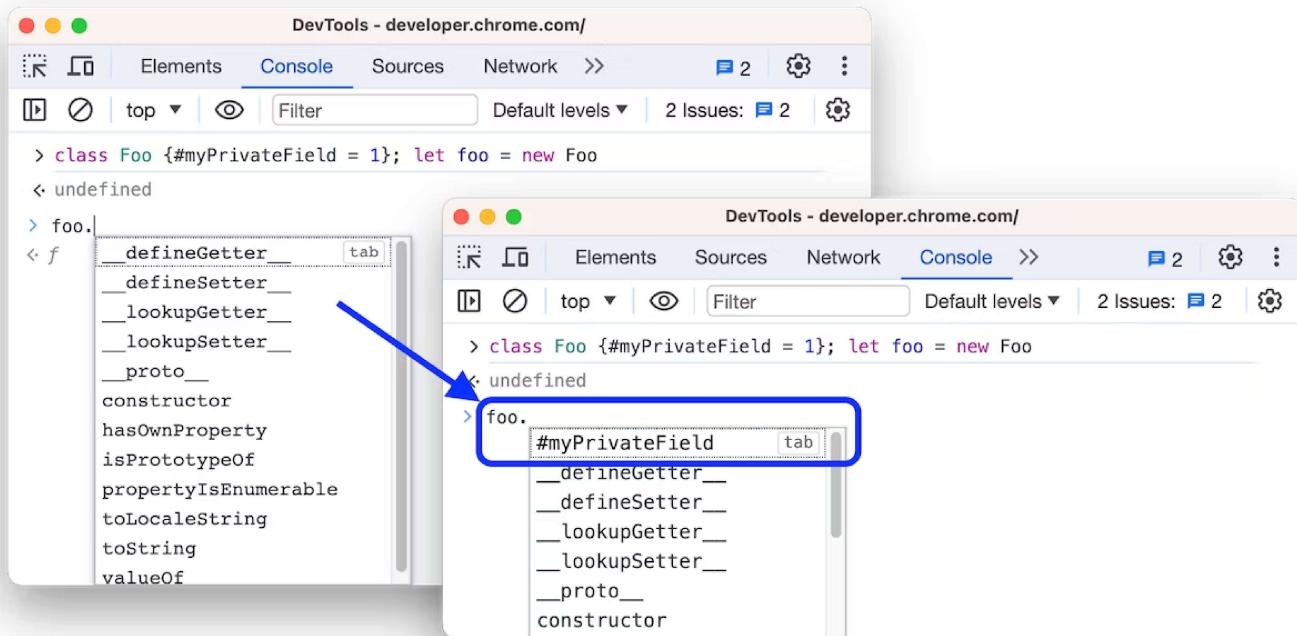

Chromium issues: [406900](#), [1473875](#).

Autocomplete private fields in Console

You can now autocomplete [private class fields](#) when evaluating them outside the class scope in the **Console**.

This site uses cookies to deliver and enhance the quality of its services and to analyze traffic. If you agree, cookies are also used to serve advertising and to personalize the content and advertisements that you see. [Learn more about our use of cookies.](#)

Chromium issues: [1483848](#), [1381806](#).

Lighthouse 11.1.0

The **Lighthouse** panel now runs Lighthouse 11.1.0. See the [full list of changes](#).

To learn the basics of using the **Lighthouse** panel in DevTools, see [Lighthouse: Optimize website speed](#).

Chromium issues: [772558](#).

Accessibility improvements

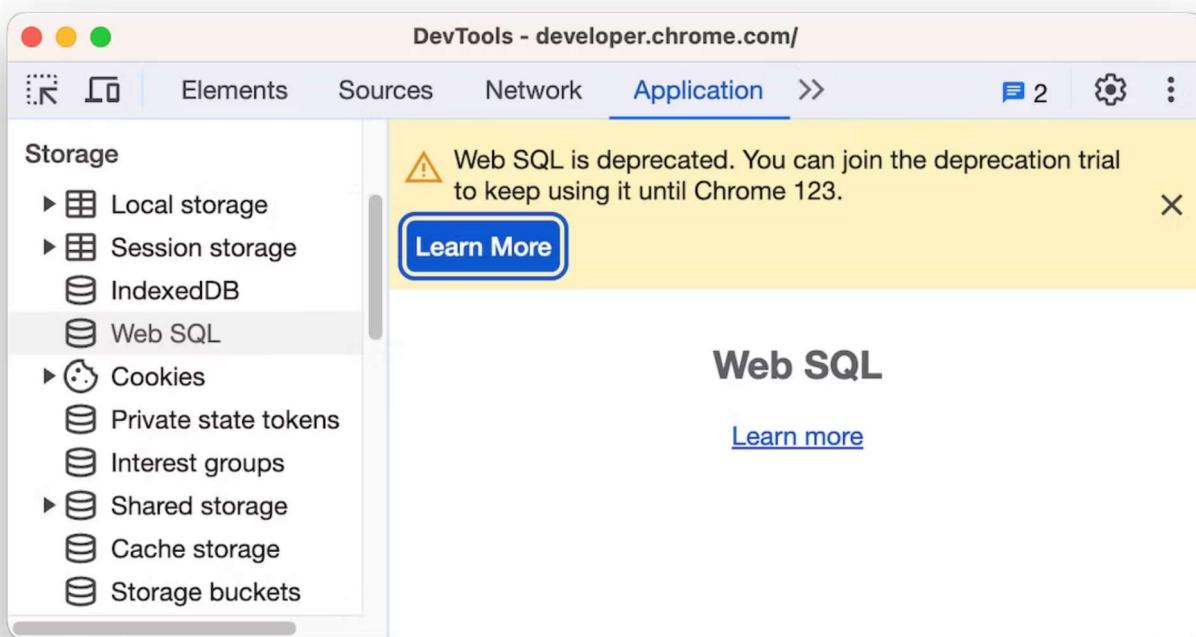

Screen readers will now read out the following:

This site uses cookies to deliver and enhance the quality of its services and to analyze traffic. If you agree, cookies are also used to serve advertising and to personalize the content and advertisements that you see. [Learn more about our use of cookies.](#)

Chromium issues: [1485257](#), [1486643](#), [1485263](#).

Web SQL deprecation

The **Application > Web SQL** section will be removed in Chrome 123 because the [Web SQL Database API isn't maintained](#) anymore. This version adds a warning to the section about the upcoming removal.

For more information, see [Deprecating and removing Web SQL](#).

Chromium issues: [1485966](#).

Screenshot aspect ratio validation in Application > Manifest

This site uses cookies to deliver and enhance the quality of its services and to analyze traffic. If you agree, cookies are also used to serve advertising and to personalize the content and advertisements that you see. [Learn more about our use of cookies](#).

For more information, see [Debug Progressive Web Apps](#) and [Add a web app manifest](#).

The DevTools team expresses gratitude to [Alexey Rodionov](#) for landing this change and other [manifest warning improvements](#) in the previous version.

Chromium issue: [1476656](#).

Miscellaneous highlights

These are some noteworthy fixes and improvements in this release:

Elements:

Animation timing function swatches are not shown for longhand CSS properties under the [expandable shorthand](#) ones ([1149182](#)).

The autocomplete for `contain-intrinsic-*` now doesn't provide the incorrect single `auto` value because it should be `auto <length>` ([1480415](#)).

This site uses cookies to deliver and enhance the quality of its services and to analyze traffic. If you agree, cookies are also used to serve advertising and to personalize the content and advertisements that you see. [Learn more about our use of cookies.](#) 

Performance:

The color parsing error during performance recording has been fixed ([1480205](#)).

Fixed the bug with [LCP](#) not showing in the **Timings** track ([1487136](#)).

Network: The **Set cookies** column now shows the correct number of cookies that are set, excluding blocked ([1486903](#)).

DevTools extensions now load after navigation to a non-blocked host ([1476264](#)).

Fixed the bug with incorrect script execution context for extensions ([1275331](#)).

Download the preview channels

Consider using the Chrome [Canary](#), [Dev](#) or [Beta](#) as your default development browser. These preview channels give you access to the latest DevTools features, test cutting-edge web platform APIs, and find issues on your site before your users do!

Getting in touch with the Chrome DevTools team

Use the following options to discuss the new features and changes in the post, or anything else related to DevTools.

Submit a suggestion or feedback to us via [crbug.com](#).

Report a DevTools issue using the **More options**  > **Help** > **Report a DevTools issues** in DevTools.

[Group files by Authored / Deployed in the Sources panel](#)[Linked stack traces for asynchronous operations](#)[Automatically ignore known third-party scripts](#)[Improved call stack during debugging](#)[Hiding ignore-listed sources in the Sources panel](#)[Hiding ignore-listed files in the Command Menu](#)[New Interactions track in the Performance panel](#)[LCP timings breakdown in the Performance Insights panel](#)[Auto-generate default name for recordings in the Recorder panel](#)[Miscellaneous highlights](#)

This site uses cookies to deliver and enhance the quality of its services and to analyze traffic. If you agree, cookies are also used to serve advertising and to personalize the content and advertisements that you see. [Learn more about our use of cookies.](#) 

[Support mouse over event in the Recorder panel](#)

[Largest Contentful Paint \(LCP\) in the Performance insights panel](#)

[Identify flashes of text \(FOIT, FOUT\) as potential root causes for layout shifts](#)

[Protocol handlers in the Manifest pane](#)

[Top layer badge in the Elements panel](#)

[Attach Wasm debugging information at runtime](#)

[Support live edit during debugging](#)

[View and edit @scope at rules in the Styles pane](#)

[Source map improvements](#)

[Miscellaneous highlights](#)

Chrome 104

[Restart frame during debugging](#)

[Slow replay options in the Recorder panel](#)

[Build an extension for the Recorder panel](#)

[Group files by Authored / Deployed in the Sources panel](#)

[New User Timings track in the Performance insights panel](#)

[Reveal assigned slot of an element](#)

[Simulate hardware concurrency for Performance recordings](#)

[Preview non-color value when autocompleting CSS variables](#)

[Identify blocking frames in the Back/forward cache pane](#)

[Improved autocomplete suggestions for JavaScript objects](#)

[Source maps improvements](#)

This site uses cookies to deliver and enhance the quality of its services and to analyze traffic. If you agree, cookies are also used to serve advertising and to personalize the content and advertisements that you see. [Learn more about our use of cookies.](#) 

[Capture double-click and right-click events in the Recorder panel](#)

[New timespan and snapshot mode in the Lighthouse panel](#)

[Improved zoom control in the Performance Insights panel](#)

[Confirm to delete a performance recording](#)

[Reorder panes in the Elements panel](#)

[Picking a color outside of the browser](#)

[Improved inline value preview during debugging](#)

[Support large blobs for virtual authenticators](#)

[New keyboard shortcuts in the Sources panel](#)

[Source maps improvements](#)

Chrome 102

[Preview feature: New Performance insights panel](#)

[New shortcuts to emulate light and dark themes](#)

[Improved security on the Network Preview tab](#)

[Improved reloading at breakpoint](#)

[Console updates](#)

[Cancel user flow recording at the start](#)

[Display inherited highlight pseudo-elements in the Styles pane](#)

[Miscellaneous highlights](#)

[\[Experimental\] Copy CSS changes](#)

[\[Experimental\] Picking color outside of browser](#)

Chrome 101

This site uses cookies to deliver and enhance the quality of its services and to analyze traffic. If you agree, cookies are also used to serve advertising and to personalize the content and advertisements that you see. [Learn more about our use of cookies.](#) 

[Support for the hwb\(\) color function](#)[Improved the display of private properties](#)[Miscellaneous highlights](#)[\[Experimental\] New timespan and snapshot mode in the Lighthouse panel](#)

Chrome 100

[View and edit @supports at rules in the Styles pane](#)[Support common selectors by default](#)[Customize the recording's selector](#)[Rename a recording](#)[Preview class/function properties on hover](#)[Partially presented frames in the Performance panel](#)[Miscellaneous highlights](#)

Chrome 99

[Throttling WebSocket requests](#)[New Reporting API pane in the Application panel](#)[Support wait until element is visible/clickable in the Recorder panel](#)[Better console styling, formatting and filtering](#)[Debug Chrome extension with source map files](#)[Improved source folder tree in the Sources panel](#)[Display worker source files in the Sources panel](#)[Chrome's Auto Dark Theme updates](#)

This site uses cookies to deliver and enhance the quality of its services and to analyze traffic. If you agree, cookies are also used to serve advertising and to personalize the content and advertisements that you see. [Learn more about our use of cookies.](#) 

[Preview feature: Full-page accessibility tree](#)

[More precise changes in the Changes tab](#)

[Set longer timeout for user flow recording](#)

[Ensure your pages are cacheable with the Back/forward cache tab](#)

[New Properties pane filter](#)

[Emulate the CSS forced-colors media feature](#)

[Show rulers on hover command](#)

[Support `row-reverse` and `column-reverse` in the Flexbox editor](#)

[New keyboard shortcuts to replay XHR and expand all search results](#)

[Lighthouse 9 in the Lighthouse panel](#)

[Improved Sources panel](#)

[Miscellaneous highlights](#)

[\[Experimental\] Endpoints in the Reporting API pane](#)

Chrome 97

[Preview feature: New Recorder panel](#)

[Refresh device list in Device Mode](#)

[Autocomplete with Edit as HTML](#)

[Improved code debugging experience](#)

[Syncing DevTools settings across devices](#)

Chrome 96

[Preview feature: New CSS Overview panel](#)

This site uses cookies to deliver and enhance the quality of its services and to analyze traffic. If you agree, cookies are also used to serve advertising and to personalize the content and advertisements that you see. [Learn more about our use of cookies.](#) 

[Copy declarations as JavaScript in the Styles pane](#)

[New Payload tab in the Network panel](#)

[Improved the display of properties in the Properties pane](#)

[Option to hide CORS errors in the Console](#)

[Proper `Intl` objects preview and evaluation in the Console](#)

[Consistent async stack traces](#)

[Retain the Console sidebar](#)

[Deprecated Application cache pane in the Application panel](#)

[\[Experimental\] New Reporting API pane in the Application panel](#)

Chrome 95

[New CSS length authoring tools](#)

[Hide issues in the Issues tab](#)

[Improved the display of properties](#)

[Lighthouse 8.4 in the Lighthouse panel](#)

[Sort snippets in the Sources panel](#)

[New links to translated release notes and report a translation bug](#)

[Improved UI for DevTools command menu](#)

Chrome 94

[Use DevTools in your preferred language](#)

[New Nest Hub devices in the Device list](#)

[Origin trials in the Frame details view](#)

This site uses cookies to deliver and enhance the quality of its services and to analyze traffic. If you agree, cookies are also used to serve advertising and to personalize the content and advertisements that you see. [Learn more about our use of cookies.](#) 

[Display raw](#) [Set-Cookies](#) [headers in the Issues tab and Network panel](#)

[Consistent display native accessors as own properties in the Console](#)

[Proper error stack traces for inline scripts with #sourceURL](#)

[Change color format in the Computed pane](#)

[Replace custom tooltips with native HTML tooltips](#)

[\[Experimental\] Hide issues in the Issues tab](#)

Chrome 93

[Editable CSS container queries in the Styles pane](#)

[Web bundle preview in the Network panel](#)

[Attribution Reporting API debugging](#)

[Better string handling in the Console](#)

[Improved CORS debugging](#)

[Lighthouse 8.1](#)

[New note URL in the Manifest pane](#)

[Fixed CSS matching selectors](#)

[Pretty-printing JSON responses in the Network panel](#)

Chrome 92

[CSS grid editor](#)

[Support for `const` redeclarations in the Console](#)

[Source order viewer](#)

[New shortcut to view frame details](#)

This site uses cookies to deliver and enhance the quality of its services and to analyze traffic. If you agree, cookies are also used to serve advertising and to personalize the content and advertisements that you see. [Learn more about our use of cookies.](#) 

[User-Agent Client Hints for devices in the Network conditions tab](#)

[Report Quirks mode issues in the Issues tab](#)

[Include Compute Intersections in the Performance panel](#)

[Lighthouse 7.5 in the Lighthouse panel](#)

[Deprecated "Restart frame" context menu in the call stack](#)

[\[Experimental\] Protocol monitor](#)

[\[Experimental\] Puppeteer Recorder](#)

Chrome 91

[Web Vitals information pop up](#)

[New Memory inspector](#)

[Visualize CSS scroll-snap](#)

[New badge settings pane](#)

[Enhanced image preview with aspect ratio information](#)

[New network conditions button with options to configure Content-Encoding settings](#)
[shortcut to view computed value](#)

[accent-color keyword](#)

[Categorize issue types with colors and icons](#)

[Delete Trust tokens](#)

[Blocked features in the Frame details view](#)

[Filter experiments in the Experiments setting](#)

[New Vary Header column in the Cache storage pane](#)

[Support JavaScript private brand check](#)

This site uses cookies to deliver and enhance the quality of its services and to analyze traffic. If you agree, cookies are also used to serve advertising and to personalize the content and advertisements that you see. [Learn more about our use of cookies.](#) 

Chrome 90

[New CSS flexbox debugging tools](#)[New Core Web Vitals overlay](#)[Moved issue count to the Console status bar](#)[Report Trusted Web Activity issues](#)[Format strings as \(valid\) JavaScript string literals in the Console](#)[New Trust Tokens pane in the Application panel](#)[Emulate the CSS color-gamut media feature](#)[Improved Progressive Web Apps tooling](#)[New `Remote Address Space` column in the Network panel](#)[Performance improvements](#)[Display allowed/disallowed features in the Frame details view](#)[New `SameParty` column in the Cookies pane](#)[Deprecated non-standard `fn.displayName` support](#)[Deprecation of `Don't show Chrome Data Saver warning` in the Settings menu](#)[\[Experimental\] Automatic low-contrast issue reporting in the Issues tab](#)[\[Experimental\] Full accessibility tree view in the Elements panel](#)

Chrome 89

[Debugging support for Trusted Types violations](#)[Capture node screenshot beyond viewport](#)[New Trust Tokens tab for network requests](#)[Lighthouse 7 in the Lighthouse panel](#)

This site uses cookies to deliver and enhance the quality of its services and to analyze traffic. If you agree, cookies are also used to serve advertising and to personalize the content and advertisements that you see. [Learn more about our use of cookies.](#) 

[New shortcuts to copy CSS properties](#)

[New option to show URL-decoded cookies](#)

[Clear only visible cookies](#)

[New option to clear third-party cookies in the Storage pane](#)

[Edit User-Agent Client Hints for custom devices](#)

[Persist "record network log" setting](#)

[View WebTransport connections in the Network panel](#)

["Online" renamed to "No throttling"](#)

[New copy options in the Console, Sources panel, and Styles pane](#)

[New Service Workers information in the Frame details view](#)

[Measure Memory information in the Frame details view](#)

[Provide feedback from the Issues tab](#)

[Dropped frames in the Performance panel](#)

[Emulate foldable and dual-screen in Device Mode](#)

[\[Experimental\] Automate browser testing with Puppeteer Recorder](#)

[\[Experimental\] Font editor in the Styles pane](#)

[\[Experimental\] CSS flexbox debugging tools](#)

[\[Experimental\] New CSP Violations tab](#)

[\[Experimental\] New color contrast calculation - Advanced Perceptual Contrast Algorithm \(APCA\)](#)

Chrome 88

[Faster DevTools startup](#)

[New CSS angle visualization tools](#)
